

We would love to have your feedback in order to understand what you like or you do not like, what we can improve, and if you find it useful!

If you are interested in trying it, we will run flacocobot on your project for a period of two weeks and then give you a 1-minute questionnaire to collect your feedback.

What do you think? Can we activate flacocobot for Dataverse?

Thanks,

Davide (@dginelli), André (@andre15silva), Matias (@martinezmatias), Benjamin (@danglotb), Martin (@monperrus)

to Dataverse Users Community

Hi Davide and team, thanks for considering the Dataverse Project for this. Over the past year we've been increasing the number of automated checks that run on PRs and the checks from flacocobot may also be helpful. We will look into this and one of the developers will get in touch with you.
